

Setup E-Mail Account Windows Mobile 5

1

Tap **Start** and tap **Messaging**

2

Tap **Menu** and tap **Tools**

3

Tap **New Account...**

4

If a dropdown appears asking you to select an e-mail provider, scroll to **Other (POP3/IMAP)** and tap **Next**.

5

In **Enter e-mail address**, enter your full email address and tap **Next**

6

At the **Auto configuration** screen, tap **Skip** or **Next**.

7

For **Your name**, enter the name you want the recipients of your mails to see. Enter the full e-mail address as user name and your password. Select the **Save password** checkbox and tap **Next**.

8

In the **Account type** field, tap to select POP/POP3. In the **Name** field, specify a friendly account name that will be easy to remember. You must use a different name for each account you set up. Tap **Next**.

9

Enter your **incoming** and **outgoing** mail server (mostly mail.yourdomain.ext) and tap **Options**.

10

Tap **Next** for the default settings or change the settings according to your preferences and tap **Next**.

11

Ensure the **Require SSL connection** is un-ticked and the **Outgoing mail requires authentication** checkbox is ticked. Tap **Next**.

12

Tap **Finish** for the default settings or change the settings according to your preferences and tap **Finish**.
